Mr. Editor: In the many questions and answers recently aimed at the gas and electric department, the real point seems to have been lost sight of in the fog of side issues. Whether the plant is worth a n.'llion or any other number of dollars is not the present issue. What rates the department should charge, although of great importance in the city's development. Is not the present question. Whether the burden of financing the owners of the property through taxition or directly by those who actually use the service is not the real point. These simply constitute a country of the service is not the real point. These simply constitute a country is the beautiful of March 4th stated that main question is a simple one. The Bulletin of March 4th stated that by reason of being without coal, service to power customers would have to be discontinued that night. Seeing the seriousness of the situation and being in a position to give assistance which would avoid such a calamity, this company through its president offered to furnish the department with 1800 k, w. which could be made available that night if promptly advised to go ahead. The necessary connection was to have been made without cost to the decase brocade, duvetyn or velvet.
